

## New Thought Vermont

Our threefold mission is to:

1. Affirm the Truth that God is All, invisible and visible.
2. Facilitate personal awakening to Spirit within.
3. Create a loving, nurturing and supportive community through the practice of the presence of God.

Only when we awaken from the dream of personality separated from Source can we open to the inherent joy, love and abundance that is our heritage. Awakened, we embrace unabashedly our Divine inheritance as "children" of God, individuated manifestation of infinite potential endlessly revealing Self. Eternal Life is ever perceiving and knowing the wonder of It's creation. Each of us is the Perceiver and the Knower. The time is now to awaken to this universal and Individual Truth.

# It's All God

## A time apart

Take a time apart...apart from daily routine and responsibility, time to remember who in Truth, we are, remembering the One Source, the Essence of all Life. Join a select group for an intimate gathering in beautiful Weston, Vermont with modern mystic and renowned author Walter Starcke. A retreat scheduled from April 15 through 17, 2008 will explore the realm of Consciousness. Walter plans an experiential co-creative time at this, his only retreat currently scheduled outside of his retreat center in San Antonio. The intent is to build on the group consciousness of those assembled. **This will be a closed retreat. Participants will not be able to register for single days or partial attendance.** Reserve your space promptly, as this event is likely to fill quickly!

As an individual, Walter Starcke is a radiant focal point for illumination of Truth, a powerful catalyst to awaken from the illusory dream of duality, of separation from singular Being. He states: "To some I may appear to be a spiritual anarchist out to destroy a number of religion's most sacrosanct superstitions, those previously thought to be prerequisites to spirituality. To others, what I have to say will be an avenue leading from past limitations into presently unbelievable new freedoms. Precisely because of my many years of trial and error, I have found and have personally demonstrated some of the necessary and very practical solutions that will take us there. It is not my intention to either perpetuate or debunk traditional religions...but rather to explore and help initiate a new, non-sectarian 'global myth' that will define the future. ...if we are to prosper we have to perceive something that has never been seen before. We must literally close the gap between our divinity and our humanity, between the visible and the invisible, between the subjective and the objective, and between consciousness and form."
